Summary

With over 3 years of professional experience as a software engineer, I have specialized in building large-scale and enterprise-level applications using various technologies such as ReactJS, VueJS, NextJS, NuxtJS, TypeScript, Node and MongoDB. My expertise extends to creating and designing RESTful APIs, building server-side rendering applications, Optimizing application performance, and developing in-house tools to streamline the development process.

I possess strong analytical skills to analyze requirements, devise efficient solutions, and optimize code performance. I stay updated with industry trends and continuously strive for personal growth and development.

My passion lies in crafting exceptional software that tackles business challenges and makes a positive impact on people's lives. Understanding corporate objectives is a priority for me, as it informs decision-making throughout the web solution development process.

Experience

SPLEET

Lead Frontend Engineer - Feb 2023 - Present

Responsibilities:

- Conducted code reviews for pull requests, mentored junior, and intern engineers, and led the front-end engineering team to improve engineering staff productivity.
- Developed the Spleet rental platform for landlords and tenants from scratch; this initiative played a key role in securing pre-seed funding, leading to a successful fundraising of \$2.6 million.
- Migrated the company website from a single page to a server-rendering application with SEO capability.

Frontend Developer

Responsibilities:

- Enhanced product functionality and made improvements using a secure, thoroughly tested, and efficient approach.
- Collaborated extensively with the development team to transform the Figma design into user-friendly and aesthetically pleasing web pages.
- I improved the application's performance by Identifying and fixing performance bottlenecks.

Full Stack Developer (Consultant)

TRUHR - Jan 2024 - Present

Responsibilities:

- Collaborated with stakeholders, including recruiters, HR professionals, and managers, to comprehend their needs and transform them into precise technical specifications.
- Designed the overall architecture of the recruitment platform, including databases, server infrastructure, and user interface components. Consider scalability, security, and performance requirements.
- Implemented security best practices to protect sensitive data, including candidate information, client details, and job listings. This involved encryption, access controls, and secure authentication mechanisms.
- Enhanced the platform's performance to guarantee quick response times and effective resource utilization. This required implementing caching techniques and optimizing the code.

Frontend Developer

BLAC BOX - Jan 2021 - Sep 2021

Responsibilities:

- I focused on creating a seamless user interface for Blac Box, a versatile multi-API system that empowers businesses.
- I integrated key functionalities like account management, payment processing, OTP confirmation, BVN verification, and real-time access to vital bank information. I ensured businesses could leverage Blacbox's full potential effortlessly.

Education

Ekiti State University

Bachelor of Education - B.Ed 2011 - 2016

Skills

React.js • Next.js • Vue.js • Nuxt.js • TypeScript • Node.js

Honors & Awards
