PROFESSIONAL SUMMARY

Experienced Senior Frontend Developer with over 5 years in building scalable and high-performance applications using various technologies such as React.js, Vue.js, Next.js, Nuxt.js, TypeScript, Express and MongoDB. My expertise extends to creating and designing RESTful APIs, building server-side rendering applications, and optimizing application performance. My passion lies in crafting exceptional software that tackles business challenges and makes a positive impact on people's lives. Understanding corporate objectives is a priority for me, as it informs decision-making throughout the web solution development process.

TECHNICAL SKILLS

Languages : HTML5, CSS3, JavaScript (ES6+), TypeScript

Frameworks/Libraries: React.js, Vue.js, Next.js, Nuxt.js, Express.js

Version Control: Git, GitHub, GitLab

PROFESSIONAL EXPERIENCE

Senior Frontend Developer

Independent Purchasing Company (IPC) | February 2024 – Present

Lagos, Nigeria

- Led the redesign and full redevelopment of GoSource app, enhancing the user interface and overall user experience from the ground up.
- Integrated complex features, including supplier management, inventory tracking, and order processing, into GoSource to streamline business operations
- Worked closely with product and design teams to align the app with business goals and improve user engagement.
- Developed and optimized responsive, high-performance web interfaces, focusing on scalability and long-term maintainability.

Senior Frontend Developer

Wosom Technologies | May 2024 – February 2025

Cyprus

- Lead the development of interactive, high-performance web applications using React and TypeScript, ensuring scalable and maintainable codebase.
- Integrate the frontend with backend services and APIs, ensuring data is fetched using an advanced data fetching and caching system, hence reducing the need for repeated network requests and improving performance
- Optimize the performance of web pages for speed and efficiency, including optimizing images, reducing load times by code splitting and lazy loading components.
- Designed and developed a role and permission access-based application enabling granular control over user access and improving system security

Lead Frontend Developer

Spleet Africa | Nov 2022 – April 2024

Lagos, Nigeria

- Take ownership of the frontend system architecture, ensuring it is scalable, modular, and maintainable. Work closely with stakeholders to establish technical solutions that accommodate future growth, maintain a high level of performance, and optimize the user experience.
- Partner with cross-functional teams to translate business requirements into technical solutions. Participate in requirements gathering and feature definition to ensure frontend implementation aligns with user needs, technical constraints, and overall product goals.
- Lead and participate in detailed code reviews, ensuring adherence to coding standards, best practices, and design patterns. Use tools like linters, formatters to automate quality checks and maintain a clean, efficient, and scalable codebase

Frontend Engineer

Nov. 2020 – Sep. 2022

- Built and maintained responsive, cross-browser compatible user interfaces for enterprise-level web applications using Vue.js, Nuxt.js, Typescript, TailwindCss, Sass
- Integrate the web applications with Vuex and Pinia for global state management.
- Collaborated with the QA team to ensure product quality through manual and automated testing and resolving cross-browser issues

- Migrated the company website from a single page to a server-side rendered application with SEO capability
- Worked in an agile environment, participating in sprint planning, daily standups, and retrospectives to ensure timely delivery of new features and bug fixes
- Lead troubleshooting efforts for frontend-related issues, including debugging, root cause analysis, and resolution of production incidents in a timely manner.

PROJECTS

Senior Frontend Developer

Resolve - Contract

April 2025 – July 2025 | Lagos, Nigeria

- Developed a custodial crypto wallet application and admin panel from scratch, integrating with Quidax to enable buying, selling, swapping, sending, and receiving of tokens
- Designed and implemented the frontend architecture, selecting scalable technologies, frameworks, and patterns to meet performance and project needs.
- Integrated real-time cryptocurrency price updates and in-app transaction notification using WebSocket connections.
- Built security features including IP whitelisting, location-based access control, and credential protection, ensuring secure user sessions and data handling.
- Implemented fraud detection mechanisms by defining rules to identify suspicious activity and enhance platform integrity

CitiTasker Technology – *Lagos, Nigeria*

- Lead the design and implementation of the frontend architecture, including selecting appropriate technologies, frameworks, and patterns to meet project requirements and scalability needs.
- Built reusable components and libraries to streamline development processes and improve code maintainability
- Maintain effective communication with other stakeholders of the organization, ensure timely updates on project progress, address technical obstacles, and propose solutions.
- Worked closely with backend developers to integrate APIs and ensure data consistency across the application.

Honors & Awards

Spleet Africa – *Best Frontend Engineer (Feb 2023)*

- Recognized as the Best Frontend Engineer for exceptional contribution and performance.
