Front-end Engineering

Taiwo Joseph

Senior Frontend Engineer | React | Next | Vue | Nuxt | Node |
Typescript
Lagos State, Nigeria

Summary

I am a proficient Software Engineer who excels in crafting engaging and high-performing user interfaces. I have a proven ability to translate intricate design mockups into responsive and efficient applications. My primary focus is on enhancing web accessibility and performance. I am adept at working with contemporary libraries and frameworks such as Vuejs, Nuxtjs, Reactjs, Express, and MongoDB. In my off hours, I dedicate my time to self-improvement, staying abreast of new technologies, and enjoying quality time with friends

Experience

Independent Purchasing Company

Senior Frontend Developer

February 2025 - Present (1 year 5 months)

Lagos State, Nigeria

Redesign and revamp the web app, enhancing the user interface and overall user experience from the ground up.

Developed and optimized responsive, high-performance web interfaces, focusing on scalability and long-term maintainability.

Worked closely with product and design teams to align the app with business goals and improve user engagement.

CitiTasker – Task Marketplace Platform

Frontend Developer

2004 - Present (22 years)

Designed and developed a full-scale task marketplace platform connecting service providers with users seeking on-demand services. Built secure authentication system using HTTP-only cookies and Next.js Server Actions for improved security and session handling. Developed complex multi-step workflows for task creation, service proposals, and dispute resolution with robust validation and state management. Integrated Paystack payment gateway with escrow functionality, ensuring secure and trust-based transactions between parties. Designed and optimized real-time notification

system for task updates, messages, and payment events. Created data-rich dashboards and tables with filtering, sorting, and pagination using TanStack React Table. Optimized performance using code splitting, dynamic imports, and React Query caching strategies.

Resolve – Custodial Crypto Wallet Platform

Frontend Developer

April 2025 - July 2025 (4 months)

Built crypto wallet integrating Quidax API. Implemented real-time price updates via WebSockets. Designed secure architecture with IP whitelisting and geo controls. Developed fraud detection system.

WOSOM SERVICES LIMITED

Senior Frontend Developer

May 2024 - July 2025 (1 year 3 months)

Cyprus

- Collaborate with the designers to translate design mockups and wireframes into functional and visually appealing interfaces
- Integrate the frontend with backend services and APIs, ensuring data is fetched and displayed correctly.
- Optimise the performance of web pages for speed and efficiency, reducing load times.

Spleet

4 years 9 months

Front End Lead

November 2022 - July 2025 (2 years 9 months)

Lagos State, Nigeria

- Lead the frontend development team in building and maintaining web applications
- Set and enforce coding standards and best practices
- Conduct code reviews and provide constructive feedback to team members
- Mentor junior and mid-level frontend developers.
- Oversee debugging and optimization efforts to improve performance.

Frontend Engineer

November 2020 - July 2025 (4 years 9 months)

Lagos State, Nigeria

- Building stable and maintainable codebase using Vuejs.
- Collaborating with the Product design team to bring all mock-ups to life.
- Communicating technical issues in an understandable manner to the team.

- Collecting data from the Back-end team via API and properly presenting those data in a user-friendly interface.
- Optimised web applications for maximum speed and scalability.
- Migrate the company website to nuxtjs

Wosom Technologies

Frontend Developer

May 2024 - February 2025 (10 months)

Built scalable React + TypeScript applications. Reduced network requests by 60% using React Query. Improved load time by 40% via code splitting and lazy loading. Implemented RBAC system with granular permissions. Integrated REST APIs and real-time updates.

Spleet Africa

Frontend Developer

November 2021 - April 2024 (2 years 6 months)

Architected scalable frontend systems for rapid feature delivery. Led cross-functional collaboration across teams. Established code quality standards and best practices. Mentored junior developers. Led frontend architecture decisions.

BLAC BOX

Frontend Developer

April 2021 - September 2021 (6 months)

Lagos State, Nigeria

I focused on creating a seamless user interface for Blackbox, a versatile multi-API system empowering businesses. I integrated key functionalities like account management, payment processing, OTP confirmation, BVN verification, and real-time access to vital bank information. My role ensured businesses could leverage Blackbox's full potential effortlessly

Education

Ekiti state university

Bachelor of Education - BEd, Early Childhood Education and Teaching · (2011 - 2016)
