Professional Summary

Results-driven Frontend Developer with 5+ years of experience architecting and delivering scalable, high-performance web applications. Expert in React.js, Vue.js, Next.js, and TypeScript ecosystems with proven ability to lead frontend development, optimize application performance, and collaborate cross-functionally to translate business requirements into technical solutions. Passionate about building user-centric applications that solve real-world problems and drive measurable business impact.

Technical Skills

Frontend: React.js, Vue.js, Next.js, Nuxt.js, TypeScript, JavaScript (ES6+), HTML5, CSS3

Styling: Tailwind CSS, Sass, shadcn/ui, Responsive Design

State Management: React Query, Zustand, Vuex, Pinia

Additional: WebSocket (Pusher), Authentication (Clerk, NextAuth), Payment Integration (Paystack), Cloud Services (Cloudinary)

Professional Experience

Frontend Developer

Independent Purchasing Company (IPC) | Lagos, Nigeria

April 2025 – Present

GoSource – B2B Procurement Platform

Live: <https://dashboard.gosource.app/market>

Github: <https://github.com/ipcafrica/gosource-admin-v2>

- Spearheaded complete redesign and redevelopment of GoSource app, improving user satisfaction and engagement through modernized UI/UX
- Architected and implemented complex B2B features including supplier management system, real-time inventory tracking, and streamlined order processing workflows

- Collaborated with product and design teams to ensure technical solutions aligned with business objectives and user needs
- Established frontend architecture emphasizing scalability, maintainability, and performance optimization for long-term growth

Relay – Real-Time Logistics & Delivery Platform

Live: <https://relaypilot.com>

Github: <https://github.com/ipcafrica/relay-frontend>

- Built logistics platform for coordinating companies, riders, and businesses
 - Developed real-time messaging (chat, typing indicators, unread counts, notifications)
 - Implemented file uploads using presigned URLs and secure confirmation flow
 - Built role-based dashboards for riders and logistics teams
 - Integrated real-time trip tracking and delivery monitoring
 - Designed mobile-first chat experience
 - Optimized performance with efficient state management and lazy loading
-

Frontend Developer

Wosom Technologies | Cyprus

May 2024 – February 2025

- Built scalable React + TypeScript applications
 - Reduced network requests by 60% using React Query
 - Improved load time by 40% via code splitting and lazy loading
 - Implemented RBAC system with granular permissions
 - Integrated REST APIs and real-time updates
-

Lead Frontend Developer

Spleet Africa | Lagos, Nigeria

November 2021 – April 2024

Live: <https://spleet.africa>

- Architected scalable frontend systems for rapid feature delivery
- Led cross-functional collaboration across teams
- Established code quality standards and best practices
- Mentored junior developers
- Led frontend architecture decisions

Award: Best Frontend Engineer (February 2023)

Key Projects

Resolve – Custodial Crypto Wallet Platform

Frontend Developer (Contract) | Lagos, Nigeria

April 2025 – July 2025

Live: <https://resolve-web-app-dev.vercel.app>

Github: <https://github.com/OmeriHQ/resolve-web-app>

- Built crypto wallet integrating Quidax API
 - Implemented real-time price updates via WebSockets
 - Designed secure architecture with IP whitelisting and geo controls
 - Developed fraud detection system
-

CitiTasker – Task Marketplace Platform

Frontend Developer | Lagos, Nigeria

2024 – Present

Live: <https://www.cititasker.com>

Github: <https://github.com/cititasker/CititaskerClient>

- Designed and developed a full-scale task marketplace platform connecting service providers with users seeking on-demand services
- Built secure authentication system using HTTP-only cookies and Next.js Server Actions for improved security and session handling
- Developed complex multi-step workflows for task creation, service proposals, and dispute resolution with robust validation and state management
- Integrated Paystack payment gateway with escrow functionality, ensuring secure and trust-based transactions between parties
- Designed and optimized real-time notification system for task updates, messages, and payment events
- Created data-rich dashboards and tables with filtering, sorting, and pagination using TanStack React Table
- Optimized performance using code splitting, dynamic imports, and React Query caching strategies
